

2017 Year In Review

2017 brought changes to OFOSA's business model, but not our MISSION! Based on several factors, it was decided to sell our current physical shelter and revert our business model back to being a foster-based rescue. This decision brought with it some new challenges that needed to be faced in order to continue our mission. We have been able to create new and unique partnerships to help us accomplish our goals. We have tentative plans to seek a new physical shelter in 2019.

Here's a recap of our year in 2017...

Adoptions -1216

Surgeries- 1410

Transports - 770

Oregon Friends of Shelter Animals

Data represents 1 location(s) for January 2017 – December 2017

ADOPTIONS

OUR ULTIMATE MISSION

Adopt Some Love

OFOSA Adoption Testimonials

"I just found my new best friend! Their staff of volunteers are the best. Their work is so heartbreaking and they smile through it all. They really do care and guide you through the process well. These animals are lucky to have people like these!"

~Brenna Rogers

"Koshka and Gadzooks (formerly Pea and Pod) are two of the most charming, well socialized and affectionate kittens I have ever adopted. The adoption process couldn't have been easier! Thank you for all of your hard work!"

~Sarah Khiller

"This was a great experience!!! My husband and I were looking for a doggie that needed tons of love and support...we happened to stumble upon a little boy named Blake. We decided to contact the shelter and the next day we met him and adopted him! We knew Blake was special needs and our previous boy who passed away, had a very similar story...which made us connected to Blake immediately. Truly such a great experience and all the people here truly loved all the animals as well. We can't wait to give him the best loving life possible and we are so happy he is a loving part of our family!"

~Kandra Luna

"We adopted a dog from here this month and couldn't be more happy! Fortunately, he was just the right dog for us."

~Nicole Babbitt

About 7 years ago we adopted Wonderpuff the kitten. I just finished the paperwork to adopt Mondo (now Oscar) from OFOSA today and have been fostering kittens with them about 4 months now. Competent staff and supportive foster network. Good cause! I commute about 35 minutes here when I have local shelters in my area but it's worth the drive.

~Katie Eros

TRANSPORT

OFOSA rescues animals from all over California and Pacific Northwest high kill shelters to follow our hearts and our mission.

COMMUNITY SUPPORT

MELVIN

Melvin was 5 weeks old and not growing. He could not keep food in his tummy because he had a stricture in his esophagus. Because of a generous donation, he went to OSU vet hospital and received life saving surgery. He is now doing great and loving his new home.

BUMBLEBEE

Bumblebee was found outside under a bush having just been born. She was brought to OFOSA with her wet umbilical cord still attached. Bumblebee was fostered and bottle fed. She did remarkably well, never got sick. She was very photogenic, just a cuteness overload.

A picture of her was posted on Jackson Galaxy's Facebook page, and he took notice. Bumblebee received almost 60,000 likes, and over 2000 comments!

Eventually Bumblebee was adopted by a family with 2 children, one of which has special needs. Bumblebee's calm loving ways have been a comfort and joy for her family.

PRINCE

Prince came to OFOSA with his mom. He had a birth defect causing a twisted and low-functioning front leg. His tendons and muscles had not matured properly and he had trouble walking. After a specialized type of prosthesis (a hobble-walker) was created for him along with extensive physical therapy he is able to walk (with a hop) and is thriving in his new home!

BAILEY

Meet Bailey, she came to us with a broken leg. Because of a generous donor, OFOSA was able to get her the surgery she needed. We were able to save her leg. After 8 weeks of rehab and a loving foster mom to care for her, she is living in her forever home and expected to have a normal life.

MOMS AND BABIES

The most at-risk animal in a high kill shelter is moms with babies. OFOSA takes in about 200 litters a year.

ORPHANS

Another at-risk animal in a high kill shelter are orphan babies. They have a weak immune system and need round-the-clock care. OFOSA takes in many of these a year.

THANK YOU!
