ADOPT SOME LOVE

Year In Review
2022

To say it's been an interesting year would be an understatement. We, along with other rescues across the country, have been experiencing significantly lower adoption rates (ours was down 50%), along with a 25% increase in owner surrenders, returns, and stray intakes.

This year we had a chance to help provide more spay/neuter services to feral cats. Due to an overpopulation of community cats and the limited TNR surgery providers, individuals that specialize in working with these colonies were struggling to find surgical appointments.

We were fortunate enough to have extra space in our normal rescue surgery schedule to accommodate surgeries for other rescues and trappers in need. In doing so we were able to help get more cats altered and returned to their colonies.

We continued to say 'yes' to our rescue partners when they reached out with animals who needed special medical care.

Just to name a few...this year we repaired or removed broken legs, facilitated FHO surgeries, consulted with orthopedic, neurology, and ophthalmology specialists, treated calicivirus and panleukopenia virus, saved pregnant mammals and orphans, handled dental emergencies, and nursed animals back from malnourishment and certain death.

Here's a recap of 2022 Intakes & Outcomes...

OFOSA Adoption Testimonials

- I adopted Owen from OFOSA earlier this year. He is such a sweet boy, and they did a lot to help him before I adopted him. He was neutered, vaccinated, chipped, and placed with a wonderful foster. The entire process was smooth, and all the staff and volunteers were amazing. I highly recommend this wonderful organization to people who ask where I got Owen from. These people are doing great work to save pets in need and help them find forever homes. Love this organization! --@esotupo

- We adopted our wonderful cat, Noalani, as a kitten from them. She later got a cold and they helped us treat her. They're very kind and wonderful. --Sue Connelly

- We just adopted a beautiful puppy from OFOSA, and we could have not been happier with our choice. The process was smooth from beginning to end. The foster parent of our puppy was wonderful! She responded to my initial inquiry promptly, arranged a meeting day and she asked all the necessary questions before proceeding. Once she decided we, as a family, were the right fit she sent me detailed information about the adoption process. She fostered two pups from the same litter, and I loved how her only request was to keep them together the longest, needless to say this was not long at all, both pups had eyes on them and we end up bringing ours home very fast. The administrator over at OFOSA was great too, she was very detailed with the information, and took her time to explain everything and answer our questions. I will definitely recommend this organization to whoever is looking to adopt an animal. --Fatima

TRANSPORT

OFOSA's mission relies on the tireless commitment of our rescue and transport partners! We rescue animals from high kill shelters all over California and the Pacific Northwest. Some of the animals come from as far away as Taiwan! And this year we continued to take In many more stray and abandoned cats from our local communities.

MEDICAL CASES

If you look the word 'cute' up in the dictionary, you'll see a picture of Tucker! With his deep brown eyes, sweet face and silly scoot we can't help but smile when we're around this guy!

Tucker started his life happy and healthy. As he grew, for unknown reasons, he developed issues with his back legs and can no longer walk normally. He was surrendered to OFOSA for treatment so that he can live his best life.

Because of our generous donors, we were able to get Tucker the reconstruction surgery on both of his legs! Tucker has recovered fully and is now living his best life with this adopters!

MEDICAL CASES

Ezran was a complicated case that took almost TWO years to resolve! The sad truth is that he would have been euthanized in an overcrowded shelter, but OFOSA was committed to restoring this kitty to health and finding him the perfect FOREVER home.

He's proof that even pets that some people might deem 'imperfect' deserve second chances!

MEDICAL CASES

POMIE

Pomie came to us all the way from Taiwan! She needed hip surgery so she could live her best life!

Thanks to our compassionate community, she is enjoying life as a healthy, happy pup!

MEDICAL CASES

These three kitties were narrowly spared their lives in an overcrowded shelter in California. Luckily, our rescue partner knew that we would accept them even with their various medical issues.

They received x-rays, medications, consultations with orthopedic surgeons, major dental work, and blood work.
